

ULTIMA NETWORK RACK

The sturdy construction of Ultima Network Racks and the careful attention to detail makes them the ideal solution for Data Networking, CCTV and Audio Visual applications.

A number of construction methods from fully welded frames to patented flat pack technology ensures a product is available no matter what your application. Manufactured with a bolted steel frame chassis for strength and stability. The cabinets are assembled with a range of extras including fan trays, heavy duty castors, levelling feet, shelf, PDU and vertical cable management panels in the 800mm wide cabinets. We can also deliver the cabinets flat-packed for situations with limited access.
